SUBJECT INDEX

ACTH
  effect of chronic, treatment on the physical state of lipid droplets in rat adrenocortical cells, 781
Adrenals
  changes in adrenocortical lipid fluidity of hyperfunctioning human, 791
Agonist-stimulated pituitary gonadotrophs
  calcium signaling and secretory responses in, 453
Aldosterone
  the differential regulation of, output in hamster adrenal, 809
Aldosterone synthase
  molecular biology of, in rat, 415
3-Alkyl-2-phenylbenzo-[*b*]thiophenes
  non-steroidal estrogen antagonists with mammary tumor inhibiting activity, 557
11β-Amidoalkyl estradiol
  a new series of pure anti-estrogens, 609
Androgen(s)
  biosynthesis of, by the sesterterpene pathway via 23,24-dinor-4-cholen-3-one, 871
  receptor(s)
    functional domains of the human, 671
    in LNCaP cells, 665
    isoelectric focusing and 2D electrophoresis of the human, 43
  the role of cell–cell interactions in, action, 487
5α-Androstane-3,17-dione
  in peripheral plasma of men and women, 185
Anti-hormone(s)
  mechanisms of, action, 217
Aromatase
  activity in gonads of turtle embryos, 851
  activity, serum oestradiol and their correlation with demographic indices, 769
  inhibition by R 83,842, the dextro isomer of R 76 713, 761
  inhibition by 7-substituted steroids in human choriocarcinoma cell culture, 85
  RU54115, a tight-binding, inhibitor potentially useful for the treatment of breast cancer, 773

BALB/c-3T3 cells
  effect of embryonic mouse, on the proliferation of the human mammary cancer cell line T-47D, 553
Breast cancer
  effect of embryonic mouse cells BALB/c-3T3 on the proliferation of the human, cell line T-47D, 553
  estrogen sulfatases and sulfotransferases activities in human, 323
  influence of tamoxifen, aminoglutethimide and goserelin on human plasma IGF-I levels in, patients, 541
  in situ production of estrogens in human, tissue, 891
  modulation of oestrone sulphatase activity in, cell lines by growth factors, 563
  oestrogen receptor structure and function in, 529
  regulation of, cell cycle progression by growth factors, steroids and steroid antagonists, 315
  regulation of tumor–host interactions in, 389
  RU54115, a tight-binding aromatase inhibitor potentially useful for the treatment of, 773

Calciotropic hormones
  during reproduction, 469
cAMP
  opposite regulation of, concentration in the quail oviduct and the mouse uterus by tamoxifen, 571
cDNA(s)
  functional expression of, for bovine 11β-hydroxylase-aldosterone synthases, *P*450(11β)-2 and -3, and their chimeras, 779
Congenital adrenal hyperplasia
  prenatal diagnosis/treatment in families at risk for infants with steroid 21-hydroxylase deficiency, 445

Contraceptive progestins
mechanisms of hormonal and antihormonal action of, at the molecular level, 479
Corticosteroid
side chain oxidations: metabolism of 20-dihydrosteroids and evidence for steroid acid formation by direct oxidation at C21,151
Corticosteroid-binding globulin
biosynthesis of hepatic, ontogeny and effect of thyroid hormone, 135
Creatine kinase
responsiveness of the 5′ flanking region of the brain type isozyme of, to estrogens and antiestrogen, 711
Cytochrome *P*-450
influence of captopril on adrenal, 799

Dihydrotachysterols
metabolism of, renal side chain and non-renal nuclear hydroxylations *in vivo* and *in vitro*, 859
Dihydrotestosterone
the effect of, on the estrogen-induced cytodifferentiation of the chick oviduct, 701
DNA
-binding and non-, -binding forms of the transformed glucocorticoid receptor, 715
-binding, by the glucocorticoid receptor, 249
effect of ligand binding and, binding on the structure of the mouse oestrogen receptor, 291

Endometrial adenocarcinoma cells
regulation of transforming growth factor gene expression in human, 309
Endometrial stromal sarcoma
expression of estrogen receptors, progesterone receptors and estrogen-induced SRP27 (24K) suggests hormone responsiveness, 589
Enterolactone
and estradiol inhibit each other's proliferative effect on MCF-7 breast cancer cells in culture, 615
Epidermal growth factor (EGF)
immunoreactive, in human benign prostatic hyperplasia, 683
Estradiol
aromatase activity, serum, and their correlation with demographic indices, 769
-binding components in intestinal mucosa of female rats, 197
enterolactone and, inhibit each other's proliferative effect on MCF-7 breast cancer cells in culture, 615
induction by, of the microsomal low-affinity glucocorticoid binding sites (LAGS) in the male rat liver, 757
possible involvement of transforming growth factor-β in the inhibition of rat pituitary tumor growth by, 125
Estradiol 17-sulfate
the physiological role of, during pregnancy, 567
Estrogen(s)
as a growth factor to central nervous cells, 633
inhibition of, biosynthesis and its consequences on gonadotrophin secretion in the male, 437
in situ hybridization of ovalbumin mRNA in the chick oviduct reveals target cell specificity for, and progesterone, 641
in situ production of, in human breast cancer tissue, 891
receptor(s)
effect of ligand binding and DNA binding on the structure of the mouse, 291
placental, production at mid and late baboon pregnancy, 171
regulates expression of the *jun* family of protooncogenes in the uterus, 113
sulfatases and sulfotransferases activities in human breast cancer, 323
Estrone sulfatase
modulation of, activity in breast cancer cell lines by growth factors, 563

Fibroblast growth factor-like protein(s)
regulation of, in the androgen-responsive human prostate cell line LNCaP, 659
Flavonoids
insights from, signals that mediate plant–*rhizobia* symbiosis, 301

Genes
oestrogen receptor, structure and function in breast cancer, 529
regulation of expression of the, encoding steroidogenic enzymes in the ovary, 409

structure and tissue-specific expression of 3β-hydroxysteroid dehydrogenase/5-ene → 4-ene isomerase, in human and rat, 421
transcriptional activation of *jun* and actin, by estrogen during mitogenic stimulation of rat uterine cells, 523
Genitalia
ambiguous, due to partial activity of cytochromes *P*450c17 and *P*450c21, 37
Glial cells
demonstration of steroid hormone receptors and steroid action in primary cultures of rat, 621
Glucocorticoid(s)
biological effects of, hormones on two rat colon adenocarcinoma cell lines, 739
in malignant lymphoid cells, 273
receptor(s)
a model of, unfolding and stabilization by a heat shock protein complex, 223
DNA-binding by the, a structural and functional analysis, 249
the effect of oxidation/-reduction on the charge heterogeneity of the human, 1
Gonadotropin(s)
interaction between ovarian and adrenal steroids in the regulation of, secretion, 495
Growth factor(s)
immunoreactive epidermal, in human benign prostatic hyperplasia, 683
in breast cancer, 389
modulation of oestrone sulphatase activity by, in breast cancer cell lines, 563
regulation of breast cancer cell cycle progression by, 315
regulation of transforming, gene expression in human endometrial adenocarcinoma cells, 309

Heat shock protein
a model of glucocorticoid receptor unfolding and stabilization by a, complex, 223
differences between aldosterone and its antagonists in binding kinetics and ligand-induced, 90 release from mineralocorticosteroid receptor, 815
Hexafluoro-1α,25-dihydroxyvitamin D_3
effects of vitamin D-binding proteins on HL-60 cell differentiation induced by 26,26,26,27,27,27-, 109
Hormone binding domain
a model for the determination of the 3D-spatial distribution of the function of the, of receptors that bind 3-keto-4-ene steroids, 369
Human prostatic hyperplasia
immunoreactive EGF in benign, 683
partial purification of 3α- and 3β-hydroxysteroid dehydrogenases from, 689
2α-Hydroxy-4-pregnene-3,20-dione
identification of, in human pregnancy urine, 191
11β-Hydroxyandrostenedione
studies to confirm the source of, 875
21-Hydroxylase
genetic analysis of the steroid, gene following *in vitro* amplification of genomic DNA, 827
prenatal diagnosis/treatment in families at risk for infants with steroid, deficiency, 445
3α-Hydroxysteroid dehydrogenase
activity catalyzed by purified pig adrenal 20α-hydroxysteroid dehydrogenase, 179
3α- and 3β-Hydroxysteroid dehydrogenases
partial purification of, from human hyperplastic prostate, 689
3β-Hydroxysteroid dehydrogenase isomerase
structure and tissue-specific expression of, genes in human and rat, 421
purification and characterization of, from bovine adrenal cortex, 831
17β-Hydroxysteroid dehydrogenase
distribution of, gene expression and activity in rat and human tissues, 597
expression of human, in mammalian cells, 605

Insulin
mechanisms of, inhibition of ACTH-stimulated steroid secretion by cultured bovine adrenocortical cells, 11
Insulin growth factor I (IGF-I)
influence of tamoxifen, aminoglutethimide and goserelin on human plasma, levels in breast cancer patients, 541
oestradiol treatment increases the sensitivity of MCF-7 cells for the growth stimulatory effect of, 537

Interleukin 2
role of, and its receptors in carcinoma cervix patients, 837

Levonorgestrel
mechanism of action of, *in vitro* metabolism and specific interactions with steroid receptors in target organs, 881
Leydig cells
detection of testosterone secretion from individual rat, 167
gem cell–Sertoli cell interactions and production of testosterone by purified, from mature rat, 677
LNCaP cells
androgen receptor heterogeneity in, is caused by a hormone-independent phosphorylation step, 697
steroids inversely affect the biosynthesis and secretion of human prostatic acid phosphatase and prostate-specific antigen in, 349
the androgen receptor in, contains a mutation in the ligand binding domain which affects steroid binding characteristics and response to antiandrogens, 665
Luteal cells
effect of a NADPH generating system on the steroidogenic response in rat, 145

Malignant lymphoid cells
glucocorticoids in, gene regulation and the minimum receptor fragment for lysis, 273
MCF-7 cells
enterolactone and estradiol inhibit each other's proliferative effect on, in culture, 615
estrogen-stimulated glucuronidation of dihydrotestosterone in, in human breast cancer, 579
mRNA
effect of ACTH on steroidogenic enzymes in guinea pig fasciculata–glomerulosa cells: changes in activity and, levels, 59
effect of chronic ACTH treatment on guinea pig adrenal steroidogenesis: steroid plasma levels, steroid adrenal levels, activity of steroidogenic enzymes and their steady state mRNA levels, 69
expression of estrogen receptor in the rat brain: detection of its, using reverse transcription-polymerase chain reaction, 583
expression of progesterone receptor in the neonatal rat brain cortex: detection of its, using reverse transcription-polymerase chain reaction, 637
in situ hybridization of ovalbumin, in the chick oviduct reveals target cell specificity for estrogen and progesterone, 641

ONAPRISTONE
involvement of the adrenal glands in the prolactin rise induced in the female rat by, an antiprogestin, 841
Oncogenes
in breast cancer, 389
Ovary
regulation of expression of the genes encoding steroidogenic enzymes in the, 409

Phospholipases
modulate immature pig testicular androgen and 16-androstene biosynthetic pathways *in vitro*, 99
Phytoestrogen(s)
dietary, and cancer, 331
Pituitary
progestin-metabolizing enzyme activities in the aged female rat, 79
Progestagenic drugs
intrinsic estrogenicity of some, 53
Progesterone
antagonists: tumor inhibiting potential and mechanism of action, 339
in situ hybridization of ovalbumin mRNA in the chick oviduct reveals target cell specificity for estrogen and, 641
receptor(s)
composition, assembly and activation of the avian, 201
mechanisms of nuclear localization of the, 209
Prolactin
involvement of the adrenal glands in the, rise induced by ONAPRISTONE in the female rat, 841
Prostatic acid phosphatase
biosynthesis and secretion of human, in the LNCaP cell line, 349

Protooncogenes
estrogen regulates expression of the *jun* family of, in the uterus, 113

Receptor(s)
androgen(s)
functional domains of the human, 671
heterogeneity of, in LNCaP cells is caused by a hormone-independent phosphorylation step, 697
immunoreactive EGF in human benign prostatic hyperplasia: relationships with, 683
in LNCaP cells, 665
isoelectric focusing and 2D electrophoresis of the human, 43
subcellular location of, in rat prostate, 693
the human, structure/function relationship in normal and pathological situations, 361
estrogen(s)
effect of ligand binding and DNA binding on the structure of the, in the mouse, 291
expression of, in the rat brain, 583
in human benign prostatic hyperplasia, 683
glucocorticoid(s)
a model of, unfolding and stabilization by a heat shock protein complex, 223
association of the transformed, with a cytoskeletal protein complex, 719
DNA-binding and non-DNA-binding forms of the transformed, 715
duration of antagonizing effect of RU486 on the agonist induction of tyrosine aminotransferase via, 723
effect of oxidation/-reduction on the charge heterogeneity of the human, 1
interaction of glucocorticoid analogues with the human, 733
mutations in the 'zinc fingers' or in the N-terminal region of the DNA binding domain of the human, facilitate its salt-induced transformation, but do not modify hormone binding, 727
subcellular location of unoccupied and occupied, by a new immunohistochemical technique, 753
progesterone
composition, assembly and activation of the avian, 201
detection of, mRNA in the neonatal rat brain cortex, 637
mechanisms of nuclear localization of the, 209
RU 486
duration of antagonizing effect of, on the agonist induction of tyrosine aminotransferase via glucocorticoid receptor, 723
related to *P*450 activities induced by dexamethasone and phenobarbital in rat hepatoma cells, 653
stereochemical complementarity of progesterone, and cavities between base pairs in partially unwound double stranded DNA, 647

Steroid(s)
evolution of regulation of, -mediated intercellular communication in vertebrates, 301
Steroid hormones
excitatory amino acid regulation of gonadotropin secretion: modulation by, 847
intragonadal signalling mechanisms in the control of, production, 515
involvement of, in bovine oocytes maturation *in vitro*, 855
transcriptional control by, 241
Steroid 11β-hydroxylase
molecular biology of rat, 415
Steroid hydroxylation
a conspicuous down-regulating effect of morphine on essential, reactions and certain drug *N*-demethylations, 91
Sterol sulphate sulphohydrolase
subunits of, from human placenta microsomes, 141
Sulfatase
steroid, in the human ovary and placenta, 161

Tamoxifen
opposite regulation of cAMP concentration in the quail oviduct and the mouse uterus by, 571
Testosterone
kinetic mechanism of reduction of testosterone by hepatic 5β-reductase of chicken, 29
Testosterone 5α-reductase
17β-acylurea derivatives of 4-azasteroids as inhibitors of, 765

Transcription-polymerase chain reaction
expression of estrogen receptor in the rat brain: detection of its mRNA using reverse, 583
expression of progesterone receptor in the neonatal rat brain cortex: detection of its mRNA using reverse, 637
Transforming growth factor (TGF)
regulation of, gene expression in human endometrial adenocarcinoma cells, 309
Tyrosine aminotransferase
two liver-enriched *trans*-acting factors support the tissue-specific basal transcription from the rat, promoter, 747

Vasotocin
interactions between, and other corticotropic factors on frog adrenal gland, 795
$1,25(OH)_2$-Vitamin D_3
a steroid hormone that produces biologic effects via both genomic and nongenomic pathways, 231
the cellular and molecular regulation of, production, 401
